## DERSLERİMİZDE E GÜVENLİK

## GÜVENLİ ŞİFRE OLUŞTURMA PROBLEMLERİ PERMÜTASYON- KOMBİNASYON- OLASILIK

Bilge sosyal medya hesabı için 4 haneli şifre oluşturmak üzere:

A=1,2,3,4  
B=a,b,c  
C=\*,#

kümelemlerin elemanlarını kullanacaktır. şifre ile ilgili olarak aşağıdakiler bilmekteyiz:

- Şifredeki karakterlerin her biri aynı olmayacak
- Şifre bir karakterden başlamayacaktır
- Şifre bir kümenin en az bir elemanını kullanacaktır.

Buna göre bu hesap için kaç farklı şifre oluşturabilir?

$3 \cdot 2 \cdot 4 \cdot 3 = 72$

$3 \cdot 2 \cdot 1 \cdot 4 = 24$

$2 \cdot 3 \cdot 2 \cdot 4 = 48$

$2 \cdot 3 \cdot 4 \cdot 2 = 48$

$(72 + 24 + 48 + 48) = 216$

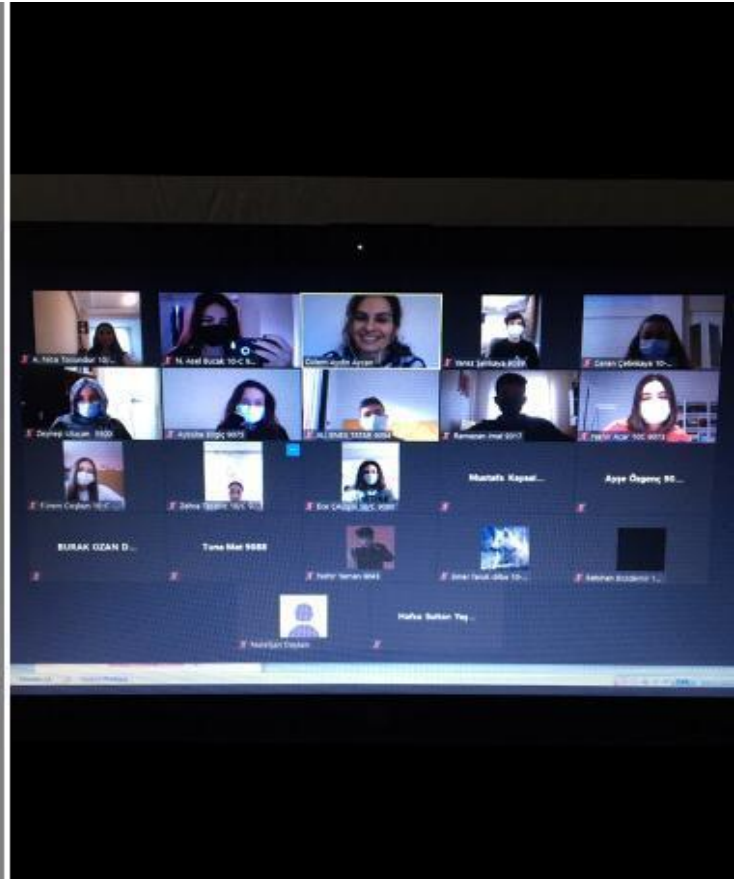

$(216) \cdot 6 = 1296$

## GÜVENLİ İNTERNET GÜNÜ ETKİNLİKLERİMİZ:

**What is unacceptable online behaviour?**

Some online unacceptable behaviours include the following:

- Disguising yourself as another person through emails or messaging
- Spreading rumours or false information about others
- Sending rude, harassing or threatening messages
- Creating websites that ridicule, humiliate or intimidate others
- Flouting on websites or distributing pictures of others

Electronically communicated threats are crimes and any form of cyberbullying can lead to criminal offences.

**The Effects of Cyberbullying**

Cyberbullying has the same type of effects as any type of bullying and can result in teenagers turning away from school, friends and family, and in extreme cases, life itself.

If you know someone who is being cyberbullied, speak up and help them out! Friendships are made and broken through cyberbullying. We need to try and raise awareness so victims can speak up about it!
